

Process Point
Energy Services

WHO WE ARE

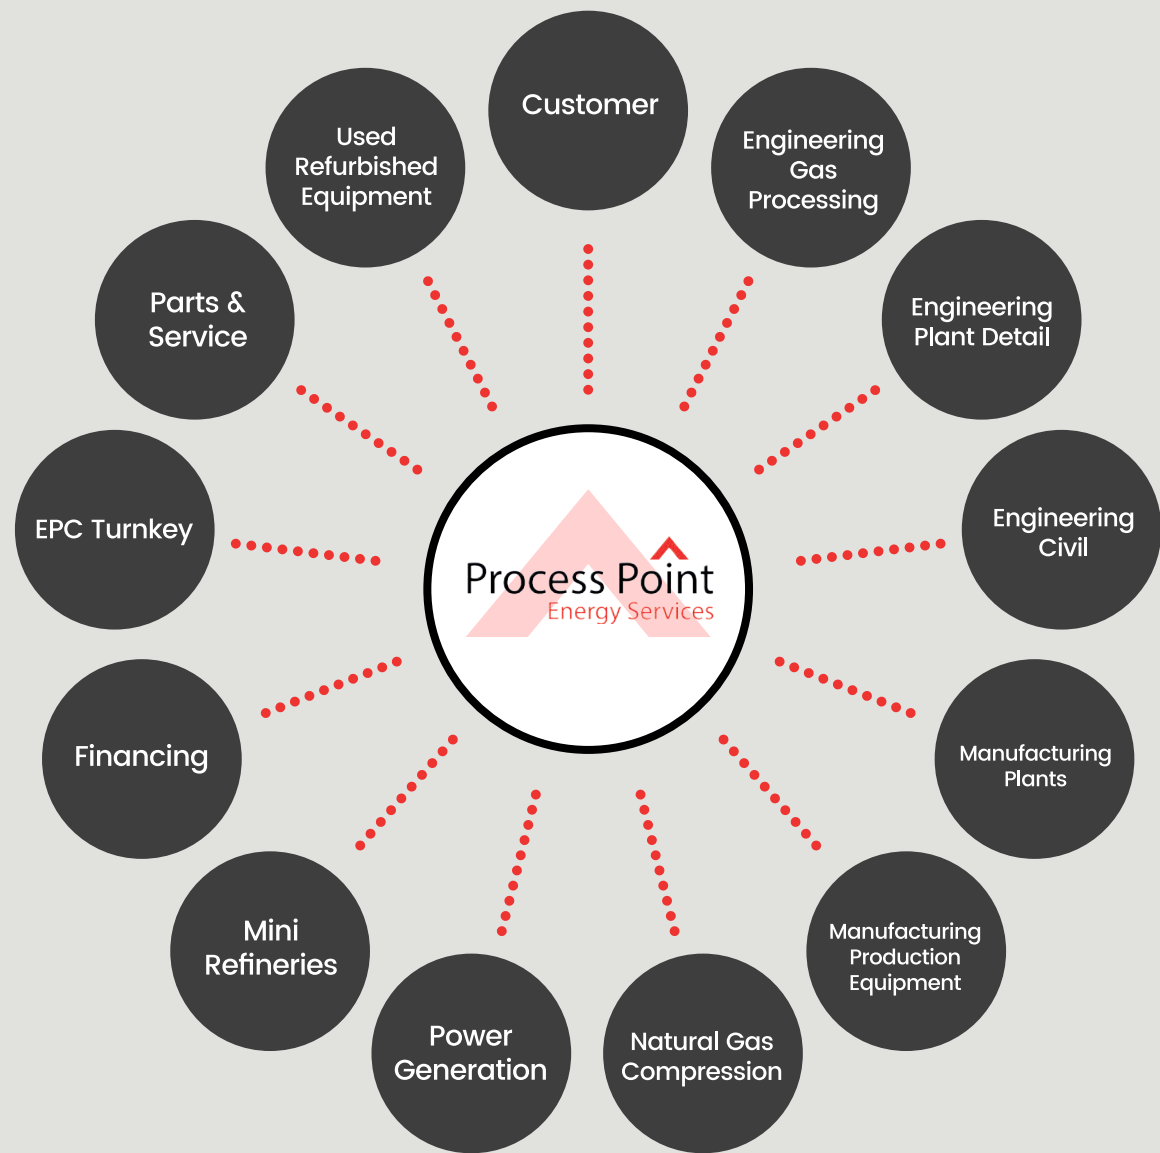

>>> **Process Point Energy Services, LLC**

is a business development project management company structured to bring resources together to provide solutions for Customers worldwide. Process Point has a large network of Engineering Firms; Manufactures for select Equipment; New Equipment; Refurbished Equipment; Natural Gas Compression; Power Generation; Crude Oil Refining; Options for EPC Turnkey; Financing Options; Equipment Lease; Parts & Service; all providing solutions to the International Energy Industry.

Process Point Energy Services

Process Point

Energy Services

Engineering: Gas Processing

Natural gas processing is a key cornerstone to our success. We have some of the best process engineers in the industry to design new plants for Cryogenics LPG recovery; CO₂ & H₂S removal; LNG Process; Dewpoint Control; Gas Sweetening & Dehydration.

Engineering: Plant Detail

Once our Process Engineers have designed the process type, then the detail engineering and heavy work begins. Detail piping design and electrical design are laid out in 3D models for precision engineering.

Engineering: Civil

Civil preparation and foundation design to match the equipment loads and weights where a plant is to be installed is another key component in our offering.

Manufacturing: Plants

Our extensive network of select manufacturers for specific products is a big part of our success. Where we have one manufacturer that builds cryo plants and another that build amine plants; both specialize in the products they offer.

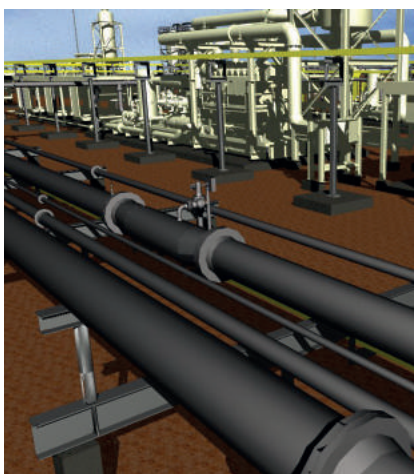

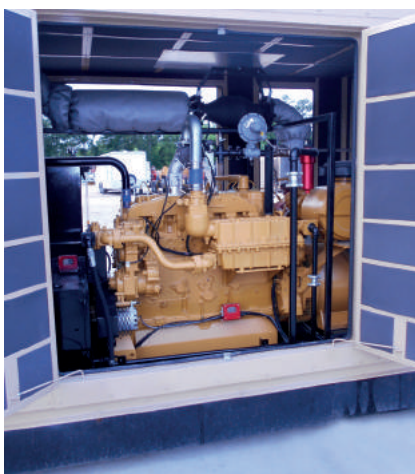

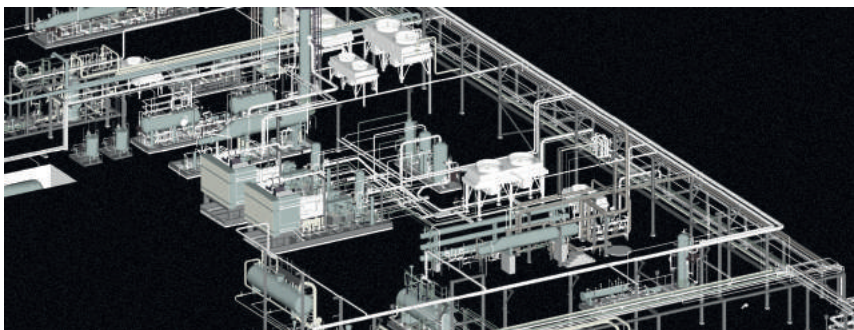

Manufacturing: Production Equipment

Production equipment such as TEG dehydration; 2 Phase separators; 3 Phase separators; Heater Treaters; Gas Filtration; Coalescent Filters;

Natural Gas Compression

We specialize in reciprocating compression proving new and/or used refurbished equipment, from small wellhead compression units to large pipeline compression units.

Power Generation

Power generation in 4-stroke engines in both natural gas & diesel; 50Hz & 60Hz; 100kw to 100MW power projects. We will also consider leasing units on a "Power Purchase Agreement" at a designated kw/hour basis.

Crude Oil Refining

Mini refinery plants, Topping Plants, Crude Refinery capable of producing Kerosene, Jet Fuel, Diesel, Gasoline and Furnace Oil. Inlet capacity up to 50k barrels/day.

EPC Turnkey

Depending on the geographical location; we have industry partners in the construction business that can install your turnkey project.

Financing Options

We have access to select project financing sources for the right fit; customer, contract, location, and project.

Parts & Services

We have industry professionals to provide Start-up Services; Overhauls & Repairs; Training and a full service of Operations & Maintenance Contracts.

Used Refurbished Equipment

With our industry booming, new equipment deliveries can be extended past the project schedule. We offer used refurbished equipment with a warranty with quick deliveries.
